

MATHEMATICAL MODELING & NUMERICAL SIMULATION

The *MMNS Chair* was created by the EADS foundation, École Polytechnique, and the INRIA, and was officially inaugurated on October 20th, 2008. Its dual aim is to encourage innovative and original research in Mathematical Modeling & Numerical Simulation and to develop education in this field through the Master and PhD programs offered at the École Polytechnique.

The MMNS chair can offer financial aid to cover the cost of tuition and/or living expenses of M1 and M2 students in our Master programs. These fellowship funds are awarded on a competitive basis. Successful graduate students who follow up their Master with a PhD are always financially supported either through the MMNS chair or by another funding agency.

Candidates applying for admission in our M1 or M2 Master programs in Mathematical Modeling at the École Polytechnique may ask for the financial aid of the MMNS chair when applying online [<http://de.polytechnique.fr/candidatures/>] and by completing their application with two letters of recommendation.
