

Second European Summer School in Financial Mathematics  
Paris, August 2009

**The School Must Go On**  
(The Show Must Go On, Queen)

*Math Finance - what are we studying for?  
Awkward silence - I guess we should ask more.  
On and on!*

*Does anybody know what we are here for?*

*Another slide - a challenge to the mind.  
And then a problem of another kind.  
How to find  
Touzi who knows all about technology?*

*Ma must go on!  
Bank must go on! Yeah!  
Inside my brain is aching.  
My attention may be fading,  
But my smile still stays on.*

*Whatever problem use BSPDEs,  
comparison theorem, it will be the key.  
On and on!  
Does anybody know if there is juice at four?  
I guess I'm learning, I must be smarter now.  
I'll soon be building fancy models now.  
Outside markets are crashing.  
But inside the math world, life is still beautiful.*

*(The) lemma must go on!  
(The) proof must go on! Yeah!  
Ooh! Inside my brain is aching.  
My attention may be fading,  
But my smile still stays on.*

*It's hard to see liquidity, like the wings of butterflies.  
Memories of summer school will grow and never die.  
I was there, my friends!*

*(The) school must go on! Yeah!  
(The) school should go on!*
